# Background

- Shandong Province established and performed the strictest environmental standard system in China, keeping sustainable improvement of environment quality while the economy remains at a rapid growth. Consequently, Shandong has become the largest environmental protection industry market in China.
- It is estimated that only the investment on air pollution prevention and control filed will reach to CNY395.5 billion Yuan during 2013 to 2015.
- Since 2004, Shandong government has successfully held 5 sessions of International Exhibition on Green Industry biennially. Approximately 3000 companies and organizations from 24 countries participated the fair, such as Korea, Japan, America, Canada, France, Singapore, Germany, Hong Kong and Chinese Taiwan, with accumulated 62,000 professional visitors and around 10,000 draft agreements been signed.
